Rail Operations Dispatcher

- System Configuration
 - Easy definable Graphical Displays
 - Database Configurable Applications
 - One Step CTC Route Generation
- Integrated Train Sheets
 - Automatic Train Sheet Creation
 - Train Notes
 - Dispatcher Login/Logout Report
 - Shift Notes
 - Weather Report
 - Train Template
 - Dispatcher Transfer Report
 - Unattended Train Check List
- Schedule Adherence
 - Schedule Creation
 - Schedule Maintenance
- Authority Control
 - NORAC Form D
 - GCOR Warrant Control
 - Daily Bulletin Orders (DOB)
- CTC Functionality
 - Switch functionality
 - Switch Movement
 - Blocking
 - Signal Functionality
 - Signal Clear
 - Entrance/Exit (NX)
 - Call-On
 - Fleeting
 - Blocking
 - Stack Routing
 - Track Functionality
 - Office Blocking
 - Field Blocking
 - Special Elements
 - Local Control
 - Snow Melter
 - Crossing Status
 - Field Alarms and reporting
 - Train Tracking

Technology at work for you

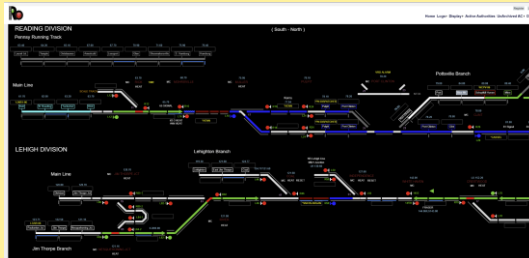

CONNECTING YOUR RAILROAD OPERATIONS TO THE TECHNOLOGY YOU NEED TODAY

Rail Operations Dispatcher (RODisp) is a state-of-the-art rail control system that increases dispatcher productivity. RODisp will allow the dispatcher to easily control CTC territory, issue authorities, and electronically store train sheets. RODisp eliminates paper train sheets and paper forms. This will allow for the railroad to process this data for internal use. RODisp uses standard off the shelf hardware using the latest Microsoft Windows Operating Systems in a variety of hardware configurations.

RODisp uses web based technologies to allow Archive Data to be accessed through out the railroad property and remotely. The following is a list of web accessible data.

- Archived Event Log data
- Archived Authorities
- Archive data Reports
- Web based Displays
- View Active Authorities

Date	Time	User	Action	Description
11/11/11	10:00:00	ADMIN	ADD	ADDED NEW TRAIN TO TRACK
